ASX: SER

Disclaimer and compliance statement

This presentation has been prepared by Strategic Energy Resources Limited (ASX: SER) (SER or the Company). It contains general information about the Company's activities current as at the date of the presentation. The information is provided in summary form and does not purport to be complete. This presentation is not to be distributed (nor taken to have been distributed) to any persons in any jurisdictions to whom an offer or solicitation to buy shares in the Company would be unlawful. Any recipient of the presentation should observe any such restrictions on the distribution of this presentation and warrants to the Company that the receipt of the presentation is not unlawful. It should not be considered as an offer or invitation to subscribe for or purchase any securities in the Company or as an inducement to make an offer or invitation with respect to those securities. No agreement to subscribe for securities in the Company will be entered into on the basis of this presentation or any information, opinions or conclusions expressed in the course of this presentation. This presentation is not a prospectus, product disclosure document or other offering document under Australian law or under any other law. It has been prepared for information purposes only and is not a recommendation as to whether to invest in SER shares. The information contained in this presentation is not investment or financial product advice and is not intended to be used as the basis for making an investment decision. The presentation has been prepared without taking into account the investment objectives, financial situation or particular needs of any particular person. Unless otherwise specified, data and tables set out in this presentation are based on SER management estimates.

This presentation does not include all available information on SER, and any potential investor should also refer to SER's Annual Reports and ASX releases and take independent professional advice before considering investing in SER. For more information about Strategic Energy Resources Limited, visit the website at <http://www.strategicenergy.com.au/>.

No representation or warranty, express or implied, is made as to the fairness, accuracy, completeness or correctness of the information, opinions and conclusions contained in this presentation. To the maximum extent permitted by law, none of SER or its directors, or any of their employees or agents, nor any other person accepts any liability, including, without limitation, any liability arising out of fault of negligence, for any loss arising from the use of the information contained in this presentation. In particular, no representation or warranty, express or implied is given as to the accuracy, completeness or correctness, likelihood of achievement or reasonableness or any forecasts, projections, prospects or returns contained in this presentation nor is any obligation assumed to update such information. Such forecasts, prospects or returns are by their nature subject to significant uncertainties and contingencies. Past performance is no guarantee of future performance.

This presentation may contain "forward-looking statements" within the meaning of securities laws of applicable jurisdictions. Forward-looking statements can generally be identified by the use of forward looking words such as "may", "will", "expect", "intend", "plan", "estimate", "anticipate", "believe", "continue", "objectives", "outlook", "guidance" or other similar words, and include statements regarding certain plans, strategies and objectives of management and expected financial performance. These forward-looking statements involve known and unknown risks, uncertainties and other factors, many of which are outside the control of SER and any of its officers, employees, agents or associates. Actual results, performance or achievements may vary materially from any projections and forward-looking statements and the assumptions on which those statements are based. Readers are cautioned not to place undue reliance on forward-looking statements and SER assumes no obligation to update such information.

This announcement has been approved for release by the Board of Strategic Energy Resources.

Corporate Overview

Tight capital structure with an invested team

Capital Structure

Our Strategy

Specialised Undercover Explorers and Project Generators

SCIENCE DRIVEN

Targeting Tier-1 Ni-Cu-Au discoveries undercover along known mineralized terrain; Internal project generation

TECHNICAL EXCELLENCE

Collaborate with industry; Leverage research funding and opportunities; Proven exploration success at depth

SHARE RISK & REWARD

Pursue co-funding grants; Maintain exposure to exploration upside; Return cash for ongoing project generation

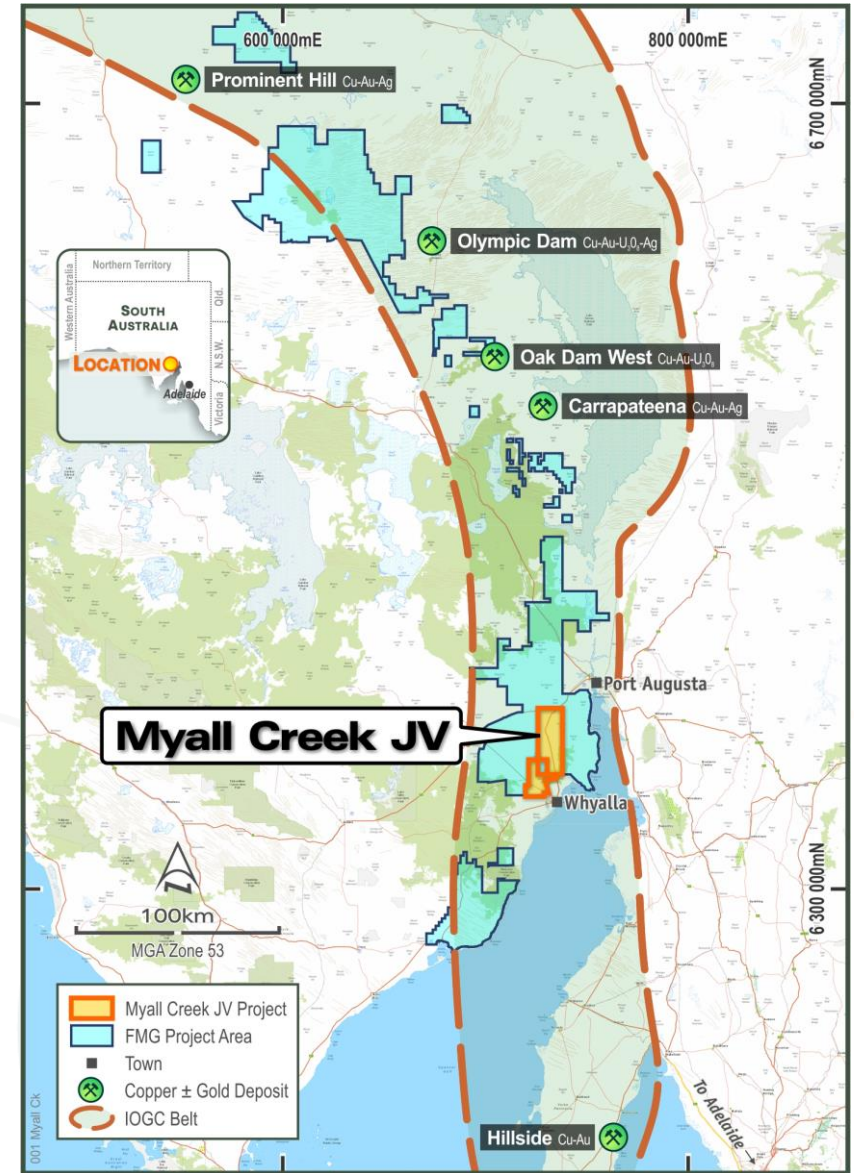

Myall Creek Copper Project

Fortescue Earning-in

- Compelling exploration project in the Olympic Copper-Gold Province, home to giants including Olympic Dam, Prominent Hill and Carrapateena
- Targeting IOCG mineralisation in the Proterozoic basement and sediment hosted copper mineralisation in overlying sediments
- Over 15km strike length sediment-hosted copper sulphide hosted in the basal units of the Tapley Hill Formation – surrounded by Fortescue

Fortescue Farm-in Joint Venture

- \$1.5M spend over 5 years, with a minimum of 1,500m of drilling for 80%; standard industry dilution post Earn-in¹
- Detailed magnetic / radiometric survey (2019), Native Title Agreement signed (2022), ground gravity survey completed this year
- **Prospect ranking underway with Earn-in requiring multiple drill holes**

¹ASX SER Announcement March 2020

Cowal Gold Projects

Evolution Option Agreement

- Located within the Cowal Igneous Complex, nearby Evolution Mining's >11Moz Cowal Gold Mine and the >1Moz Marsden Cu-Au deposit
- Projects located in open ground – secured through competitive tender
- Minimal work undertaken by SER to identify and secure these projects over the last 2 years
- 2022 Binding Option Agreement with Evolution; 2-year Option to purchase one/both tenements¹, \$300k Option fee, \$1M cash/tenement
- Evolution withdrew from Option Agreement covering East Cowal following a limited 3 month desktop review – project inaccessible
- Cash from Option Agreement used to fund ongoing exploration at East Cowal and additional NSW projects
- **Evolution forward exploration activities in 2023 may include additional geophysics and/or drilling**

¹ASX SER Announcement September 2022

Isa Undercover Initiative

Exploring the Undercover Extensions...

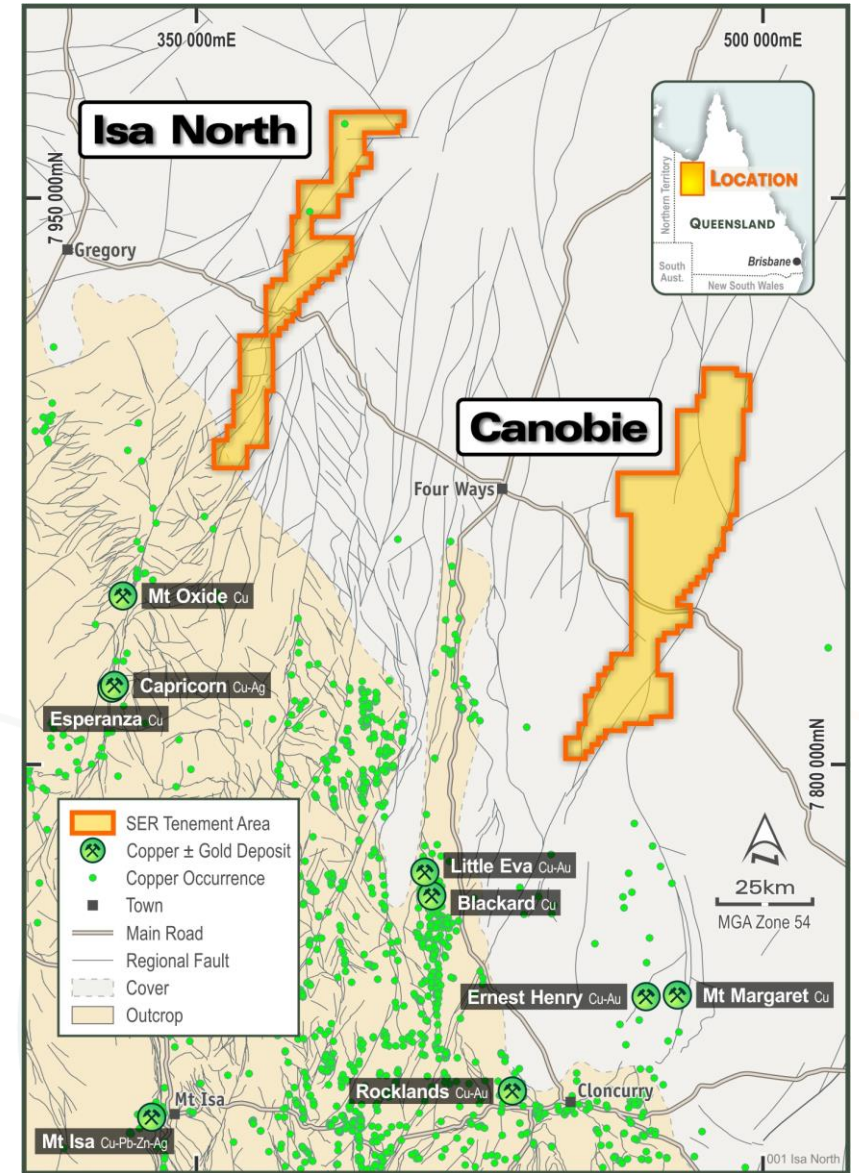

- Two regionally significant projects covering over 2,500km² of the undercover extensions of known mineralised terrains

Canobie Project

- Captures >1,800km² within the Mt Isa Eastern Succession, including a 100km N/S undercover extension of the Quamby fault host to Evolution Mining's Ernest Henry Cu-Au Gold mine (140km to the south)
- Significantly underexplored (<30 drill holes) with historical high-grade Au hits at Lucky Squid and Ni intersections at Tea Tree and Kalarka

Isa North Project

- Captures >900km² along the projected northern extension of the mineralised Mt Gordon fault, host to several large deposits to the south including the Capricorn copper deposits held by 29Metals (ASX: 29M)
- Highly prospective for IOCG and Sediment hosted Copper style mineralisation with majors now surrounding the project

Canobie Ni-Cu + Cu-Au Project

A Forgotten Polymetallic Province

- High-grade Gold intercepts drilled at the Lucky Squid Prospect include:
 - 2008 Anglo American: SXDD005 - **17m @ 6.75g/t Au** from 631m
 - 2010 AngloGold Ashanti: SXDD014 - **15m @ 9.09g/t Au** from 699m
 - 2019 SER: SXDD020 - **6m @ 12.08 g/t Au** from 519m **incl. 2m @ 32g/t Au**¹
- Significant Nickel intercepts at the Tea Tree and Kalarka Prospects including;
 - 1994 MIM Exploration: TT001D - **10.4m @ 0.25% Ni, 0.28% Cu** from 508.2m
 - 2021 SER: CNDD001A - 132m @ 0.1% Ni from 507m incl. **2m @ 0.68% Ni**, 0.17% Cu from 635m
 - 2021 SER: CNDD002 - 43m @ 0.1% Ni from 615m and **0.6m @ 0.96% Ni**, 0.11% Cu from 661.6m¹
- 2022 Gravity survey & Magnetic Remanence study identified numerous clusters of vector magnetic anomalies coincident with **interpreted chonoliths**²
- Chonolith style intrusions are analogous to those seen in globally significant Nickel deposits including Noril'sk – Talnakh (Russia), and Nova-Bollinger (W.A.)
- **Co-funding application succesful - diamond drill Ni-Cu Prospect this year**

¹ ASX SER Announcement December 2021

² ASX SER Announcement November 2022

Isa North Cu-Au Project

First mover advantage

- Acquired from Newcrest in 2021 - retain a FROR and 1% NSR (10yrs)¹
- 4 targets drilled (5,190m); Lorraine North (INMD001) identified as a near-miss;
 - **Interpreted Tier-1 halo intercept** within a >5km hydrothermal system – High Priority
- Follow-up drilling limited due to landholder access – now secured
- 2021 Red Metal Limited (ASX:RDM) intersected 44.4m of hydrothermal ironstone and breccia (GTK2101), copper assay numbers up to 0.34% provided proof of concept³; subsequent interpretation being typical of proximal to an IOCG setting⁴
 - Chalcopyrite in hydrothermal breccia and carbonate veins²
- **Multiple IOCG targets – Diamond drill program scheduled for this year**
- Entire region since secured by Fortescue, Rio Tinto and Anglo American
- **Magnetotelluric (MT) survey in search of alternative mineralization styles**

South Cobar Cu-Au Project

The next exploration 'hot-spot'

- Located at the southern end of a proven mineral region hosting the Federation Deposit (ASX:AMI) and the CSA Copper Mine (Metals Acquisitions Corp)
- Eight quality targets identified from detailed magnetic survey¹, three outcropping
- **Achilles 1**: Southern end of a major shear zone - priority target;
 - 2005 Western Plains Gold (WPG): DDH-A1-2 (300.4m) intersected a broad zone of intense hydrothermal alteration, peak values of 0.33% Cu from 90 to 92m, **within a 64m zone averaging 0.10% Cu, from 76m to 140m proximal to defined soil anomaly – never followed up**
 - DDH-A1-1 abandoned due to caving at 184.1m – did not reach target depth
- 2021 Australian Gold and Copper (ASX:AGC) intersected **85m @ 0.13% Cu** from 165m in RC hole from Achilles 3 to the north along the Achilles shear²
- 2022 *Ultrafine+*TM soil geochemistry program identified a significant coincident Cu-Au and multi-element anomaly – 800m strike extent gold in soils anomaly¹
- GSNSW New Frontiers Drilling grant (\$120k) secured
- Drill permits complete, drill pads cleared in February
- **Diamond drill program to test Achilles 1 Cu-Au Prospect this year**

Near Term News Flow

Drilling our way through 2023 and beyond ...

1. Canobie Ni-Cu Project

- Co-funding application successful (\$275k) to drill Ni-Cu target this year

2. Isa North Project

- Diamond drill program planned to test multiple IOCG targets
- Magnetotelluric (MT) survey to confirm multiple mineralisation styles

3. South Cobar Project:

- Co-funded diamond drill program at Achilles 1 Cu-Au Prospect

4. Mundi Project

- Co-funded MT survey scheduled for Q3; landholder engagement underway

5. Myall Creek FJV Project (FMG Earn-in)

- Ground gravity survey complete; Earn in requires drilling

6. South Cowal Project (EVN Option)

- Ground gravity survey complete; Next step may include drilling
